EXPERIENCE

Shanghai Jiao Tong University - Machine Vision and Intelligence Group

Undergraduate Research Intern

Shanghai, China

Oct. 2021 - Present

• Unified Human Action Understanding Project

- Research on unifying multi-modal physical action spaces (2D, 3D, image, video, etc.) to a unified semantic space through the introduction of linguistic structure knowledge.
- Design and conduct experiments to extend our method on video datasets and verify the performance.

• Human Action Knowledge Engine Project

- Study on improving Human-Object Interaction (HOI) detection by incorporating human action knowledge.
- Conduct experiments to examine the effect of image depth and multi-person interactions on HOI detection.
- Research results were submitted as co-author in two papers, one of which was accepted by ECCV' 22.

Microsoft Research Asia - Data, Knowledge and Intelligence Group
